Introduction: adverbs and adverbial modification

Norbert Cover & Donna DeLillo
The issue about the syntactic profile of adverbial modification

the that they have to be seen in a different light. It seems that
adverbial clauses are located in the main clause, and that
the complement in adverbial clauses, such as "that" clauses
are also seen as part of the main clause.

The nominal structure generated for a given sentence

The nominal structure generated for a given sentence
includes the following components:

- The sentence
- The noun phrase
- The verb phrase

In certain cases, the nominal structure is augmented to include other elements, such as prepositional phrases or clauses.

Another possibility is the inclusion of the syntactic profile of the adverbial modification.

The syntactic profile of the adverbial modification

The syntactic profile of the adverbial modification
includes the following components:

- The adverbial phrase
- The adverbial complement
- The adverbial clause

In certain cases, the adverbial profile is augmented to include other elements, such as prepositional phrases or clauses.

The syntactic profile of the adverbial modification

The syntactic profile of the adverbial modification
includes the following components:

- The adverbial complement
- The adverbial clause

In certain cases, the adverbial profile is augmented to include other elements, such as prepositional phrases or clauses.
As a matter of fact, the data that are based on empirical evidence, in a DP and on literature, are less clear. Although certain movements and trends appear to be consistent with the data provided by empirical evidence (e.g., the correlation between service performance and customer satisfaction), these may not be as strong as expected. The data suggest that the relationship between service quality and customer satisfaction is complex and multidimensional. Therefore, it is crucial to consider the impact of various factors, such as employee behavior, customer expectations, and environmental influences, on service satisfaction and customer loyalty. 

In the following sections, we will delve into the role of employee behaviors in shaping customer expectations and satisfaction.
The position ascribed to the empirical case follows from the need to establish the empirical case, and the condition that prevents the corresponding conditionals are tied together between the two events. The condition that prevents the corresponding conditionals are tied together between the two events.
